

# Space Solutions for Congress & Conference Centres

De Boer | *Committed to your success*

CE

### Hall in Hall

Quick to build modular structures allow for instant creation of new purpose spaces within exhibition and conference halls with a look and feel that resembles that of a permanent building. For example, fit for purpose conference rooms, auditoria, restaurants, hospitality and brand experience facilities.

### Soundproofing

The innovative De Boer Acoustic Barrier Mat system has a proven track record in improving the acoustics of both the interior and exterior of structures. Especially important when sound sensitive areas can take place, without interrupting other business in close proximity.

### Floorspace multiplier

Lifting functions to a second level with the De Boer mezzanine system doubles the floorspace for functions such as restaurants and meeting areas, allowing more sellable m<sup>2</sup> within the same space.

EXTERNAL SPACE

*'De Boer has proven to be a reliable partner.'*

## SPACE AS A TURNKEY SERVICE

De Boer delivers bespoke turn-key temporary structures at any location. Every project requires unique combination of project services, structures and components and facility management.

*'We want to achieve the highest client satisfaction. We are here for you to meet your challenges, and we know time and money are key to your success.'* De Boer Team
